NGUYEN HOANG LONG

Geospatial Systems Engineer

github.com/longPeoo
longpeoo.io.vn/about/

I am currently work at Vegastar Technology Company as a Geospatial Data Science Engineer. I found my interest in Earth Observation and Remote Sensing since I followed the bachelor program at USTH. After almost 6 years of studying and experiencing in Remote Sensing, I want to continue pursuing my career, gaining experiences in these field.

Skills

Tools and Software	Python, JavaScript, NodeJS, MatLab, R, Google Earth Engine, SNAP, ENVI, QGIS, ArcGis, G4Beamline
Quantitative Research	Remote Sensing, Earth Observation, GIS, Data Analyze, Programming
Languages	Vietnamese (Native speaker), English (Expert), French (Starter)

Education

MSc in Remote Sensing, Astrophysics & Satellite Technology **9/2021 — 10/2023**
University of Science & Technology of Ha Noi

BSc in in Space & Application **7/2018 — 8/2021**
University of Science & Technology of Ha Noi — Graduated with Good degree — GPA: 13.36/20

Technical Experience

Geospatial Data Science Engineer **10/2023 — Current**
Vegastar Technology Co., Geospatial Department *Hanoi, Vietnam*

- Earth observation, Remote sensing imagery processing, GIS processing.
- Automating the process of processing Radar data, creating landslide and subsidence maps of Vietnam's provinces and cities over time.
- Software developer for automating remote sensing image processing and geospatial data processing.
- Designing the content of courses on remote sensing, remote sensing image processing, geospatial and geospatial data processing.
- Web GIS developer based on Python and R programming languages.

Researcher (Master Internship) / Analysis of the spatial and temporal variability of water in the Mekong River **3/2023 — 8/2023**
LOG, supervisor: Asc Prof. Charles Verpoorter (email: charles.verpoorter@univ-littoral.fr) *Wimereux, France*

- Characteriztion of the organic and inorganic fraction of suspended particulate matter using Landsat-8, Sentinel-2 data.
- Apply several atmospheric corrections algorithm: Polymer, C2RCC, Sen2Cor, MAJA, etc for pre-processing all the data.
- Neural Network Algorithm

Researcher (Internship) / Flood risk assessment in Can Tho city from Earth Observation with SAR imagery **7/2022 — 10/2022**
HUNRE, supervisor: Dr. Truong Van Anh (email: tvanh@hunre.edu.vn) *Hanoi, Vietnam*

- Used Landcover data (Sentinel-2), SAR Sentinel-1 images and Digital Elevation Model to get flood risk map for Can Tho.
- Used Google Earth Engine for extracting binary map of water surface using SAR-Sentinel 1 images.
- Studied Hydro-Meteorology knowledge.

Researcher (Internship) / Monitoring Water surface extent of Nui Coc lake with SAR-Sentinel 1 Observation **4/2021 — 7/2021**
USTH, supervisor: Dr.Pham Duc Binh (email: pham-duc.binh@usth.edu.vn) *Hanoi, Vietnam*

- Used SAR Sentinel-1 images for monitoring water surface extent by local method using SNAP software.
- Used Google Earth Engine for extracting water using SAR-Sentinel 1 images for comparing with the local method.
- Used Sentinel-2 optical images for comparing the results between local method and Google Earth Engine.

Member (Group Project) / Cosmic ray muons for imaging the hidden structure **10/2020 - 12/2020**
USTH, supervisor: Asc Prof. Nguyen Thi Hong Van (email: nhvan@iop.vast.ac.vn) *Quy Nhon, Vietnam*
ICISE, supervisor: Dr.Cao Van Son (email: cvson@post.kek.jp)

- Studied about Neutrinos (history, phenomelogy, interaction, detection, sources and applications).
- Hardware trained: measured Multi-Pixel Photon Counters characteristics, DRS4 for digitalizing the signal.
- Simulate the process of using muons particles to detect the Queen's Chamber in the pyramid by G4Beamline.

Leader / Data Labelling **6/2020 — 9/2020**
InLab, InfoRe *Hanoi, Vietnam*

- AI algorithm and applied for Python coding.
- Participated in face recognition for checking employee attendance.
- Trained and mentored new member in labelling data using for AI in automatic cars in Korea.
- HR management experience: manage the work and results of team members.

Activities

IBM Data Science Certificate	2021
BCNV - "Early Protect, Live Confidently" - Volunteer	2020
Quick Response Team - National Steering Committee for COVID-19 Prevention and Control of Vietnam	2020
Completion in Vietnam School on Neutrino 2020 from the ICISE	2020
Award for Outstanding Final Presentation in VSON 2020	2020
